

SERIES BF, BAG FILTER HOUSINGS

ESG Series BF Bag Filter Housings are designed to remove bulk solid particles from the liquid stream. ESG Series BF bag filters are typically used in applications where bulk solids need to be removed or as a pre-filter up stream of an ESG Series LF polishing filter. Series BF Housings come with a stainless steel support basket that prevents liquid bypassing the bag. Available with a wide range of bag materials, in nominal micron ranges from 1 to 800 microns. The Series BF Housings can be used in most liquid services. Contact the nearest office to discuss your particular application.

SPECIFICATIONS:

Orientation:	Vertical only
Inlet/Outlet Sizes:	1" to 6" standard (Larger available upon request)
Number of Bags:	1 to 5 (Larger available upon request)
ANSI Ratings:	150# - 600#
Service:	Sweet or Sour
Materials:	Carbon Steel housing, 304 SS Basket
MDMT:	-20°F
Design Temperature:	Up to 400°F (dependent on bag material)
Closure:	T-Bolt Standard

OPTIONS:

- 304 or 316 Stainless Steel housing.
- Low temp materials.
- Several Quick Opening Closure designs are available.
- All flanged construction.
- Special linings available.
