

solving the toughest water, wastewater and process challenges wherever they occur

Customers need to meet evolving and complex regulations while managing tighter budgets and improving outcomes. They need a technology and solution provider with expertise and innovation to help them overcome their water and process challenges. It is our goal to enable our customers to meet increasing water demands, overcome scarcity challenges, enhance their environmental stewardship and comply with regulatory requirements.

SUEZ's offering for Water Technologies & Solutions has the most comprehensive set of chemical, equipment and digitally enabled services and products to help our customers manage and optimize their water resources and overcome pressing challenges.

We're focused on solving our customer's most difficult problems so that they have the peace of mind and confidence to grow their businesses.

full-service provider delivering across the value chain

- Digital water and data intelligence for asset performance
- Engineering, procurement, construction, and project financing
- Equipment and systems ranging from ultrafiltration membranes to zero-liquid-discharge systems
- Instruments and water quality monitoring products and systems
- Lifecycle Services
- Process line optimization and asset preservation
- Specialty chemicals and related services
- Water services (B2B, O&M, mobile water)

applications

- Asset performance services
- Biosolids and biowaste
- Boiler Treatment
- Cooling Water Treatment
- Drinking water and desalination
- Dust Control
- Enhanced Oil Recovery
- Ingredient Water
- Metals Removal
- Process Solutions
- Sludge Treatment
- Wastewater Treatment
- Water Quality Monitoring
- Water reuse
- Zero-liquid-discharge

industries

- Automotive, transport & aeronautics
- Chemical & Pharma
- Construction, decommissioning & materials
- Electronic & Microelectronic
- EPCs
- Food & Beverage
- Metals & Mining
- Power
- Pulp & Paper
- Refining & Petrochemicals
- Upstream Oil & Gas
- Utilities
